

Lesson Plans for Week of March 30th

Students, please review the guidelines for E Learning that I emailed and shared with you last week. Many questions you may have can be answered in that document. Also, please check your email as frequently as possible. That will be our best method of communication.

6th Grade Social Studies

Monday

Log in to Discovery Education and access your assignments. Find the assignment titled, "Physical Features of Europe." We will be doing a map exploration using the maps in this assignment. On each page, there are three questions that can be answered using the map on that page. Type your answers to the questions on each of the seven pages into a Word document. Each answer should be one or two complete sentences. Remember, you can go back and look at the maps as many times as you need. For today's assignment, I would just like for you to review each of the seven maps and read the questions. You do not need to start answering them yet. We will work on that tomorrow.

Tuesday

Start answering the questions for each of the maps. Remember, your answers should be one or two complete sentences. Type them into a Word document on Office 365. Your goal should be to have half of the questions finished by the end of the day today. You will have time to finish the rest of them tomorrow.

Wednesday

Use today to finish any of the questions you have not yet completed. Once you have answered all of the questions, you can share your Word document with me on Office 365. Please change the name of the file to Europe Map Exploration and include your first and last initial. This will help me keep all of the files separate. In order to receive full credit and not lose points for being late, your assignment needs to be submitted to me by the end of the day today.

When you have questions, please send me an email. If I cannot answer the question in an email, I will record a short video that answers your questions and email it to you.
