Rising Sun-Ohio County Schools
High Ability Academic and Enrichment Opportunities

Kindergarten – Sixth Grade Students
Once students are identified as high ability students they are provided summer enrichment opportunities. The enrichment opportunities are themed and last for fifteen hours in the summer months. Lessons are provided by licensed high ability teachers or highly effective classroom teachers under the supervision of the high ability coordinator.

First – Fifth Grade Students
High Ability students in grades 1-5 are placed in cluster groups and are taught using acceleration and differentiation by licensed high ability teachers or highly effective classroom teachers under the supervision of the high ability coordinator.

Seventh and Eighth Grade Students
High Ability students in grades 7-8 take a trip during the summer to visit colleges. As a rural district, many students have not had exposure to college campuses. This experience allows students the opportunity to begin exploring college and career opportunities prior to entering high school.

Sixth – Twelfth Grade Students
Middle and High School students identified as High Ability will begin taking honors and accelerated courses including math, English, science, social studies, health, and Spanish.

Fourth - Twelfth Grade Students
Students in fourth to twelfth grades are invited and encouraged to participate in Academic Competitions.

Kindergarten - Twelfth Grade Students
All High Ability students participate in RtI/Homeroom time that is differentiated and exposes them to accelerated and college and career planning experiences.
